

# Exhibit 13

# client

NOUN

## Etymology

### Summary

Of multiple origins. Partly a borrowing from French. Partly a borrowing from Latin.

**Etymons:** French *client*; Latin *client-*, *cliēns*.

< (i) **Anglo-Norman** *clyent*, *cliaunt*, **Anglo-Norman** and **Middle French** *client*, *cliant* person who employs a legal adviser (c1320 or earlier in **Anglo-Norman**, 1437 in continental **French**), person who is under the patronage or protection of another (late 14th cent., originally in specific use in Roman history),

and its etymon (ii) **classical Latin** *client-*, *cliēns* person who is under the protection or patronage of another, dependant or vassal of a foreign chief or people, in **post-classical Latin** also vassal, retainer (11th cent.), person who employs a legal adviser (from 12th cent. in British sources), participial formation < the base of *-clināre* (see [procline v.](#)).

## Notes

Compare **Spanish** *cliente* (1490), **Portuguese** *cliente* (1561), **Italian** *cliente* (first half of the 14th cent.), and also **German** *Client*, (now usually) *Klient* (first half of the 16th cent., in early use often with **Latin** inflectional endings).

## Meaning & use

- 1.a. A person under the patronage or protection of another; a dependant; (sometimes) *spec. a* feudal vassal or retainer. Formerly also: †a person who tries to win the favour or patronage of an influential person (*obsolete*). Also *figurative*. Now *historical*. a1393-

(a1393) As he [*sc.* love] is blind himself, riht so He makth his client blind also.

J. Gower, *Confessio Amantis* (Fairfax MS.) iii. l. 160

[Composed a1393]

- 1532** To..Hugh Faryngton Abbot of Redyng his pore client and perpetuall seruauant Leonarde Cockes desyreth longe & prosperouse lyfe.  
L. Cox, *Art or Crafte of Rhetoryke* sig. Aii (heading)
- 1569** The king was miserably compelled kneelyng on his knees to geue ouer both his crowne and scepter to the Pope of Rome..and as his client, vassall, feodary, and tenant, to receyue it of him againe.

1500s–1600s	<b>cliant</b>

## Frequency

*client* is one of the 1,000 most common words in modern written English. It is similar in frequency to words like *conflict*, *deal*, *demonstrate*, *game*, and *i.e.*.

It typically occurs about 90 times per million words in modern written English.

*client* is in frequency band 6, which contains words occurring between 10 and 100 times per million words in modern written English. [More about OED's frequency bands](#)

Frequency data is computed programmatically, and should be regarded as an estimate.

### Frequency of *client*, *n.*, 1750–2010

\* Occurrences per million words in written English

Historical frequency series are derived from Google Books Ngrams (version 2), a data set based on the Google Books corpus of several million books printed in English between 1500 and 2010.

The overall frequency for a given word is calculated by summing frequencies for the main form of the word, any plural or inflected forms, and any major spelling variations.

For sets of homographs (distinct entries that share the same word-form, e.g. *mole*, n.<sup>1</sup>, *mole*, n.<sup>2</sup>, *mole*, n.<sup>3</sup>, etc.), we have estimated the frequency of each homograph entry as a fraction of the total Ngrams frequency for the word-form. This may result in inaccuracies.

## Frequency of *client*, *n.*, 2017–2024

\* Occurrences per million words in written English

---

Modern frequency series are derived from a corpus of 20 billion words, covering the period from 2017 to the present. The corpus is mainly compiled from online news sources, and covers all major varieties of World English.
